

Prime Cattle Finisher Pellets

Prime Cattle Finisher Pellets are high-performance pellets formulated to finish young cattle.

Features

Nutritionally balanced ration

High Fibre

Contains Bovatec®

Contains Sodium Bicarb

Contains Yea-Sacc®

Quality Assured vitamin/ trace mineral premix

Pelleted feed

Benefits

Meets the protein, energy mineral and vitamin requirements for finishing young cattle.

Reduces the risk of acidosis and helps maintain a healthy rumen.

Improves feed conversion efficiency, reduces risk of feedlot bloat and aids in the prevention of coccidiosis and liver abscesses.

Helps to buffer the gut and reduces the risk of acidosis.

Improves digestion and performance.

Provides essential vitamins and trace minerals for top performance.

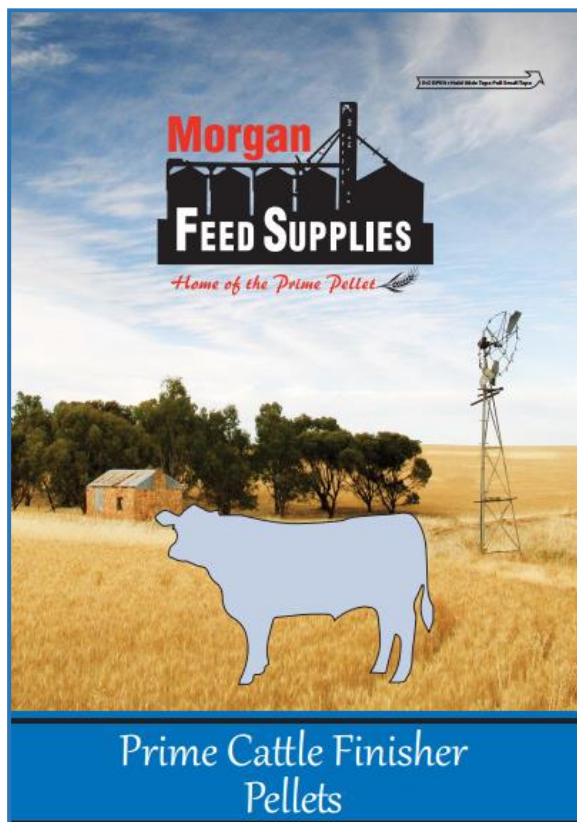

Reduces dust and wastage and is easily stored in shed, silo or bunkers

NUTRITIONAL ANALYSIS

Nutrients	Dry matter
Crude Protein (min)	15%
Metabolisable Energy (min) MJ/kg	10.77
Fibre	20%
Added Salt (max)	0.4%
Calcium (min)	0.8%
Yea-Sacc	0.5 g/kg
Mineral premix	2%

Store in cool dry place. Best used within six months.

FEEDING GUIDE

It is recommended that cattle be given an oral drench and a 7-in-1 vaccination 7 days before entering the feedlot.

Days 1-2 place cattle on unlimited good quality hay.

For optimum weight gain, cattle should be placed on the Prime Cattle Finisher Pellets for days 3 to 10 as an introductory starter ration.

Day 10 and onwards feed cattle Prime Cattle Finisher Pellets with free choice hay/straw.

Cattle will eat around 3% of their body weight per day. Eg. A 270kg weaner will eat 9.5kg/day

Weight gains should be budgeted on 1.6-2kg of live weight gain per day depending on genetics. In trials Murray Grey cattle have been known to have gained 2.2kg.

N.B: Monitor cattle for signs of acidosis at all times, especially during the start-up phase. If dung becomes loose provide more good quality hay & wait until stools firm up before increasing pellet ration.

INGREDIENTS

These pellets will contain one or more of the following ingredients: lupins, barley, wheat, cereal by-products, and cereal hay, as well as ground limestone, salt, DCP, sodium bicarbonate, vitamin/trace mineral premix, Bovatec® (Lasalocid sodium), and Yea-sacc® (yeast culture).
