

# Prime Milk Replacement Pellets

These pellets contain milk solids to provide high quality nutrients to support vigorous development of calves, lambs and kids up to 6 weeks old. They can be used as a creep feed for babies on their mothers or as a supplement to liquid milk or milk replacer when artificially reared. It is critical that all ruminant babies receive adequate colostrum (quality and quantity) in the first 6-12 hours of life to obtain vital nutrients and passive immunity from disease.

## NUTRITIONAL ANALYSIS

Nutrients	Dry matter
Crude Protein (min.)	23%
Metabolisable Energy	12Mj/Kg DM
Crude Fibre (max.)	10%
Sodium (max.)	7.5g/Kg

## INGREDIENTS
