

# Prime Cattle Finisher Pellets

Prime Cattle Finisher Pellets are scientifically formulated to increase performance by finishing young cattle in the feedlot with less days on feed returning, to the grower, maximum profit on investment.

## Features

Nutritionally balanced ration

High Fibre

Contains Bovatec®

Contains a metabolite

Contains Biotin

Contains Sodium Bicarb

Quality Assured vitamin/trace mineral premix

Pelleted ration

## Benefits

Meets the protein, energy mineral and vitamin requirements for finishing young cattle.

Reduces the risk of acidosis and helps maintain a healthy rumen microbiome population.

Improves feed conversion efficiency, reduces risk of feedlot bloat and aids in the prevention of coccidiosis and liver abscesses.

Has proven through scientific research and data to more than double the absorption of phosphorus and calcium. Hoof health, reproduction and lactation.

Assists in reducing the risk of acidosis by increasing rumen pH.

Provides essential vitamins and trace minerals for top performance.

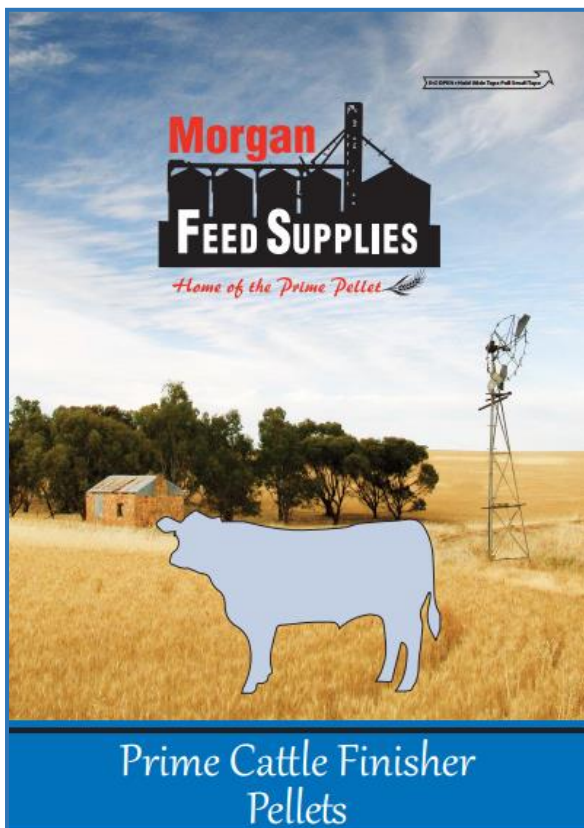

**Vitamins in premix are in stable form.**

Even nutrient blend received by each animal.

## NUTRITIONAL ANALYSIS

Nutrients	Dry matter
Crude Protein (min)	15%
Metabolisable Energy(min)	10.77MJ/kg
Fibre	20%
Added Salt (max)	0.5%
Calcium (min)	1.34%
Vitamin & Mineral premix with A.D E and Biotin	2%

## FEEDING GUIDE: After consultation with your Nutritionist.

It is recommended that cattle be given an oral drench and a 7-in-1 vaccination 7 days before entering the feedlot.

Days 1-5: place cattle on unlimited good quality hay or Prime Maintenance Pellets

Day 5 - finish: for optimum weight gain, feed cattle Prime Cattle Finisher Pellets (with occasional bale of hay or straw for extra roughage and 'gut scratch').

Cattle will eat around 3% of their body weight per day.

Eg. A 270kg weaner will eat 9.5kg/day

Weight gains should be budgeted on 1.6-2kg of live weight gain per day depending on genetics. In trials Murray Grey cattle have been known to gain 2.2kg based on no other feed on offer.

**N.B:** Monitor cattle for signs of acidosis, especially during the start-up phase. If dung becomes loose provide more quality hay & wait until stools firm up before increasing pellet ration.

**INGREDIENTS:** These pellets will contain one or more of the following ingredients: lupins, barley, wheat, cereal by-products, and cereal hay, as well as ground limestone, salt, MDCP, sodium bicarbonate, vitamin/trace mineral premix and Bovatec® (Lasalocid sodium).

**Store in cool dry place. Best used within six months.**

**DO NOT FEED TO HORSES OR OTHER MONOGASTRICS AS MAY BE FATAL**
