

Lamb Feedlot Buffer Pellet

This pellet has been formulated specifically for inclusion into a sheep feedlot grain ration as a buffer to assist in reducing the incidence of acidosis and is **NOT to be fed in isolation**.

Added micro minerals: zinc, manganese, copper, iodine, cobalt and selenium.

Added vitamins: A, D, E

Also includes: Lasalocid 665.00 (ppm) and Acid Buf® .

Inclusion Rate: 3% formulated @ average 60gms head/day dose rate.

For example, (60g dose rate) based on approx. **2kg daily intake** = 3% inclusion of MFS Lamb Feedlot Buffer Pellet (30Kg) plus 970Kg of grain, legumes, veg protein and fibre.

Benefits:

- This product is suitable for lot feeding or grain-assisted feeding of sheep/lambs.
- Contains Lasalocid –this ionophore will increase feed efficiency and conversion and reduce rumen acidosis.
- Contains Acid Buf® to reduce the risk of acidosis in high grain rations by maintaining acidity level.
- Buffers supplement the natural manufacture of buffers that occur in saliva.
- Improves digestion
- Aids in the prevention of liver syndrome, liver abscesses, rumenitis and laminitis.
- Maintains a healthy rumen function.
- Early lactation/high production - can help in transition to high concentrate rations after lambing.

Nutritional Analysis per Kg (as fed basis)

Total Protein Equivalents	14.10 %
Molasses	1.00 %
Calcium	8.08 %
Phosphorus	0.44 %
Sulphur	0.63 %
Magnesium	1.26 %
Salt NaCl	2.50 %
Crude Fat (EE)	2.74 %

Feeding Directions: Ensure that Sheep are not starving when introduced to this product. Allow continuous access once feeding has commenced. Provide clean, fresh water at all times.

Safety Directions: Avoid contact with eyes and skin. Avoid breathing dust. **First Aid:** Call Poisons Information Centre for advice 24 hrs (13 11 26) or nearest doctor at once.
