FEEDING GUIDE

This high protein pellet is designed to be fed with roughage—either hay, straw or pasture.

Daily intake will be 1.5% - 2.2% of body weight. Feed should be fed on an ad lib basis either in yards or out on pastures with good quality clean water at all times.

N.B: Monitor calves for signs of acidosis at all times especially during the start-up phase. If dung becomes loose provide more good quality hay & wait until stools firm up before increasing pellet ration.

This product does not contain restricted animal material.

For Animal use only. Store out of sunlight in a cool dry place.
