

Seasonal update

Spring is here in Western Australia and we are continuing to enjoy a fantastic growing season with this year's cropping regions set to break records. With spring and early summer likely to have an abundance of available on farm feed now is the time to plan how to best utilize this resource.

To guarantee maximum production providing correct nutrition through quality supplementation is the key.

Targeted supplementation = maximum profitability

- **Vitamin D metabolite + Biotin**

All Morgan Feed Supplies ruminant products contain a Vitamin D metabolite which is proven through scientific trials to double the absorption of calcium and phosphorus from the diet.

- **Ensure successful joining**

Providing correctly balanced macro and micro mineral supplementation pre-conceptus will enable successful joining of ewes. Now is the time to plan your ewe and ram nutrition to ensure livestock are in peak condition for joining.

Ensure supplements you provide are stable and available to your animals. Morgan Feed Supplies products use vitamins and minerals that are **globally recognised** by Optimum Vitamin Nutrition (OVN) and are **guaranteed** to be stable and available for **365 days!**

Field Days Wrap!

What a busy few months we have had attending all three Western Australian Machinery Field Days!

We have met new and old customers from around the state and are excited to know many of you are looking for ways to make the most out of your livestock and understand the importance of correct nutrition in this equation.

Horse Supplements

Morgan Feed Supplies manufactures lick blocks and loose licks formulated for horses grazing pasture and hay grown in Western Australia's unique soil conditions. Our full Equine range is available through stockists, for more information visit www.morganfeedsupplies.com.au

MFS Equine Gold Block

MFS Equine Optilick

What to feed now - Pastoral Region

Production 20 Block

A high protein cattle block with 20% urea, moderate phosphorus levels and essential micro minerals.

Promotes fibre digestion of poor or dry pastures. Builds a robust animal with a strong hoof horn which is more willing to breed and travel for food and water. Will increase weight gains in dry cows or steers and milk yield in lactating cows.

Dry Phos 10 Block

5% Phos + 10% Urea

With protein meal and urea as the source of protein and nitrogen, the additional high sulphur and magnesium inclusion will assist with live weight gains.

Also recommend -

- Production Lick 8% Urea Plus Phosphorus
- Production Lick 10% Urea Plus Phosphorus
- WA Northern Breeder Dry Season Licks - 20%, 25% and 30% Urea Formulations available.

What to feed now - Southern Agricultural Region

Maintain Mineral Block

Suitable for sheep, cattle and goats all year round. Containing 17.5% Calcium, 1.5% Phosphorus, 1.06% Magnesium, 0.30% Potassium, 1.16% Sulphur, 26.5%

Salt (NA), 3.5% Molasses, zinc, copper, manganese, selenium, cobalt, iodine, Vitamin A, D3, E, B7 (Biotin) and 25-hydroxycholecalciferol.

Summer Dry Feed Block 5% Urea

Encourages stock to forage for and fully utilize available dry feed. Suitable for sheep, cattle and goats. Contains 5% Urea,

3.5% Molasses, 15% Calcium, 3.25% Phosphorus, 2.24% Sulphur, 1.15% Magnesium, 24.4% Salt (NaCl), 1.33% Crude Fat (EE), zinc, manganese, copper, iodine, cobalt and selenium. Vitamin A, D3, E, B7 (Biotin), 25-hydroxycholecalciferol.

Premium Calcium Sulphur Mix

Specifically designed to balance diet deficiencies found in WA feed and prevents hypoglycaemia during lambing and calving. PCSM mix should be made available to animals from gestation through to weaning. During dry times it will encourage animals to utilize any available dry feed.

Also recommend -

- Sheep Lick Maintain 5% Urea
- Sheep Lick Thrive 5% Urea
