

MFS has released several new and exciting products in the supplement range. These products have been designed to cover all the essential mineral and vitamin requirements for sheep and cattle according to regional areas and seasonal conditions.

NEW PRODUCTS Available Now in 20kg and 100kg

1. Ewe and Lamb Block

This block has been designed to provide vitamins and minerals essential to both the ewe and lamb in a paddock situation to assist with the prevention of deficiencies found in areas with differing soil types. The Premix in this product contains an organic Eubiotic which will keep the ewes strong and healthy and provide the lamb with an adequate milk supply to ensure that maximum growth and production is achieved.

2. Green Feed Block

A high magnesium and mineral block formulated to provide maximum feed conversion for cattle and sheep grazing on high quality green feed which is often found to be low in essential minerals. This product will assist in maximizing any feed available to the animal by supplementing with minerals especially in the early phase of green feed.

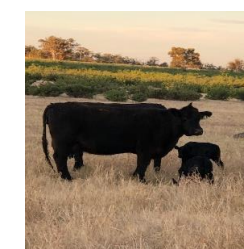

3. Plain Lake Salt Block

Salt is a critical part of a balanced diet for all livestock and other animals. This salt block will balance the sodium level necessary to the animal and can be fed out all year round. The animal will crave salt if the diet does not contain adequate levels.

4. Mol Gain 50 Slurry Cattle Production

This molasses-based production feed is exclusively designed and manufactured by Morgan Feed Supplies for WA conditions and is sold as a 2 x part product allowing it to be transported vast distances. This product will promote liveweight gain of approx. 1-1.4kg ADG based on adequate pasture or hay. Information regarding this **new** and exciting product is available on request. Enquiries: Michael 0427 373 526 or 9 574 5234. Available in 1000lt totes.

MFS PRODUCTS available in stock now

It is important to note that all pellets, blocks, licks and concentrates manufactured on site by Morgan Feed Supplies. The products contain vitamin and mineral packages, that have been shown to more than double the absorption of **calcium** and **phosphorus** from the diet, allowing the animal to replenish physiological stores at a greater rate and in a shorter period. This promotes efficient production and lowers expense. The benefits are proven through scientific research and data. All products are formulated exclusively for Morgan Feed Supplies by **** Kai Blair**.

****Kai Blair**, of Blair Agri Advisors, is employed by Morgan Feed Supplies. His professional expertise and advice to farmers and cattlemen has been invaluable. Kai is a ruminant nutritionist, animal scientist, embryologist and cattle grazer who consults globally in animal science and bio-technical reproduction, with beef, dairy, feedlot, lamb and wool clients throughout Australia and many other countries.

***The Equine Gold + Omega-3 block 20kg** is a high spec macro and micro mineral and vitamin supplement for all horse types, manufactured with premium ingredients including 'vegetarian & sustainable' Omega-3 (DHAgold™) and antioxidants which contains high levels of active & stable vitamins A, D3, E, K3, B1, B2, B3, B5, B6, B9, B12 and biotin (B7), with less than 4% sugar and 1% starch. This product will greatly benefit the horse's visual and brain development, trainability, immune system, digestion, metabolic syndrome, heart health, memory and visual performance, mobility and joint care, and skin and coat care. This product is a consistent, sustainable, non-marine source of DHA which is free of ocean-borne contaminants and is vegetarian.

All information and analysis for these products can be requested from Morgan Feed Supplies, Nutrien and associated stores, Elders and from your local stockist.
