

WET SEASON PHOSPHORUS LICK

No Urea

A Phosphorus supplement ideal for the tropics during the wet season but due to P status in WA can be applied to other regions. Urea can be added. The Vitamin D metabolite is proven to more than double the absorption of Phosphorus and Calcium lowering the cost of P supplementation and increasing herd health through energy metabolism, daily intake, live weight gains, skeletal growth and structure, digestion and metabolism of proteins, milk production and fertility. **ALSO AVAILABLE IN A 500KG/BAG BLOCK.**

Analysis per Kg (as fed basis)

ACTIVE	As fed %
Min. Crude Protein	NA
Min. Equivalent Protein	NA
Min. Total Protein	NA
Urea	NONE
Molasses	3%
Calcium	12%
Phosphorus	12%
Sulphur	1.2%
